

How to make a Yogurt Pot Easter Garden

You will need:

Corner Yogurt Pot, Colouring Pens, Scissors, Tape, Cotton Wool, Seeds (we recommend cress), Water

- Colour in the background below and the stone. Then cut them out.
- Carefully cut along the dotted lines on the background.
- Make sure your yogurt pot is washed and dry. Fold up the smaller corner.
- Push the back of the smaller corner through the hole you've made in the background and secure with tape.
- Tape the stone over the front of the smaller corner. (This is Jesus' tomb)
- Put some cotton wool in the larger corner and sprinkle some seeds on top. Add a few drops of water.
- Place your Easter Garden somewhere sunny, like a window ledge, and watch it grow. Remember to keep it watered!
